CORE SKILLS

HTML 99%

CSS 90%

React 65%

QA & TESTING TOOLS

- Postman (API Testing)
- Jira (Bug Tracking)
- JMeter (Performance)
- Playwright (Automation)
- Manual Testing

CURRENTLY LEARNING

- Python
- Java

TOOLS

Git & GitHub, VS Code

SUMMARY

BSc CSIT graduate with strong HTML and CSS fundamentals and hands-on React experience from a 7-day development workshop. Actively building QA skills through Postman, Jira, JMeter, and Playwright — learning to test the software I build, not just ship it. Looking for junior frontend development or QA/testing internship opportunities.

EDUCATION

BSc in CSIT — Shreeyantra College

Completed

TRAINING

React Development Workshop

7 days

Hands-on training covering components, hooks, state management, and building a real application.

PROJECTS

Recipe App — React, CSS

- Built a recipe-browsing web app in React where users can search and view recipes, as a hands-on project during the React workshop.
- Practiced components, props, state, and conditional rendering.

Personal Portfolio Site — HTML, CSS, React

- Built a multi-page responsive portfolio with a React-powered interactive skills panel and a working resume preview/download feature.

College Event Landing Page — HTML, CSS

- Built a responsive landing page for a college event with a mobile-first layout.

QA & TESTING PRACTICE

- **API Testing (Postman):** Practiced GET, POST, PUT, PATCH, and DELETE requests — validating responses, status codes, and error handling.
- **Bug Tracking (Jira):** Logging defects, tracking issue status, and following bugs through to resolution.
- **Performance Testing (JMeter):** Getting hands-on with basic load tests to see how an app holds up under traffic.
- **Browser Automation (Playwright):** Learning to automate repetitive UI test flows in the browser.
